

Suitable for:

SMA® ADVANCED Toddler Milk

is a fortified milk drink suitable for toddlers from 1-3 years as part of a varied, balanced diet.

SMA® ADVANCED Toddler Milk

is our most advanced recipe for young children including those born via c-section.

SMA® ADVANCED Toddler Milk contains our unique blend of multi-fibres 2'FL, DFL, LNT, 3'SL, 6'SL & 3'FL that support the growth of beneficial gut bacteria, which has been shown to promote a healthy gut microbiome.¹

Not suitable for:

1. Cows' milk protein intolerance/allergy
2. Lactose intolerance.
3. Inborn errors of metabolism such as phenylketonuria, galactosaemia and galactokinase deficiency.

Shelf life:

SMA® ADVANCED Toddler Milk powder has a shelf life of 24 months.

800 g

DATA CARD SMA® ADVANCED TODDLER MILK

From 1-3 years

For information on suitability for use in halal diets please contact our Careline team.

✓ Contains 2'FL, DFL, LNT, 3'SL, 6'SL & 3'FL

IMPORTANT NOTICE: We believe that breastfeeding is the ideal nutritional start for babies and we fully support the World Health Organization's recommendation of exclusive breastfeeding for the first six months of life followed by the introduction of adequate nutritious complementary foods along with continued breastfeeding up to two years of age. We also recognise that breastfeeding is not always an option for parents. We recommend that healthcare professionals inform parents about the advantages of breastfeeding. If parents choose not to breastfeed, healthcare professionals should inform parents that such a decision can be difficult to reverse and that the introduction of partial bottle-feeding will reduce the supply of breast milk. Parents should consider the social and financial implications of the use of infant formula. As babies grow at different rates, healthcare professionals should advise on the appropriate time for a baby to begin eating complementary foods. Infant formula and complementary foods should always be prepared, used and stored as instructed on the label in order to avoid risks to a baby's health. **SMA® ADVANCED Toddler Milk** is suitable for young children from 1-3 years, as part of a healthy balanced diet and it is not a breast milk substitute.
