DATA CARD SMA® TODDLER MILK From 1 Year +

✓ Halal Certified

Suitable for:

SMA® Toddler Milk is designed for toddlers from 12 months onwards to help ensure they get good nutrition.

SMA® Toddler Milk is supplemented with **Vitamins A, C & D**.

SMA® Toddler Milk contains a unique multi-fibre blend (2'FL* + GOS*) which is shown to promote a healthy gut microbiome.¹

SMA® Toddler Milk provides 100% of **Vitamin D*** to support the normal function of baby's immune system.

Not suitable for:

1. Cows' milk protein intolerance/allergy.
2. Lactose intolerance.
3. Inborn errors of metabolism such as phenylketonuria, galactosaemia and galactokinase deficiency.

Shelf life:

SMA® Toddler Milk powder has a shelf life of 24 months.

800 g
400 g

200 ml
Liquid

*2'FL (2'-Fucosyllactose): structurally identical human milk oligosaccharides, not sourced from breast milk; ^GOS: Galacto-oligosaccharides (a prebiotic).
*Based on 400 ml daily intake. **REFERENCE:** 1. Ben XM, *et al*. Low level of galacto-oligosaccharide in infant formula stimulates growth of intestinal Bifidobacteria and Lactobacilli. World J Gastroenterol. 2008;14(42):6564-8.

Nutrition

IMPORTANT NOTICE: We believe that breastfeeding is the ideal nutritional start for babies and we fully support the World Health Organization's recommendation of exclusive breastfeeding for the first six months of life followed by the introduction of adequate nutritious complementary foods along with continued breastfeeding up to two years of age. We also recognise that breastfeeding is not always an option for parents. We recommend that healthcare professionals inform parents about the advantages of breastfeeding. If parents choose not to breastfeed, healthcare professionals should inform parents that such a decision can be difficult to reverse and that the introduction of partial bottle-feeding will reduce the supply of breast milk. Parents should consider the social and financial implications of the use of infant formula. As babies grow at different rates, healthcare professionals should advise on the appropriate time for a baby to begin eating complementary foods. Toddler Milk should always be prepared, used and stored as instructed on the label in order to avoid risks to a baby's health. Toddler Milk is suitable for young children from 1-3 years, as part of varied, balanced diet and it is not a breast milk substitute.
